

This is the screen you see when you open the game. You can choose from these four choices by pressing on the circle.

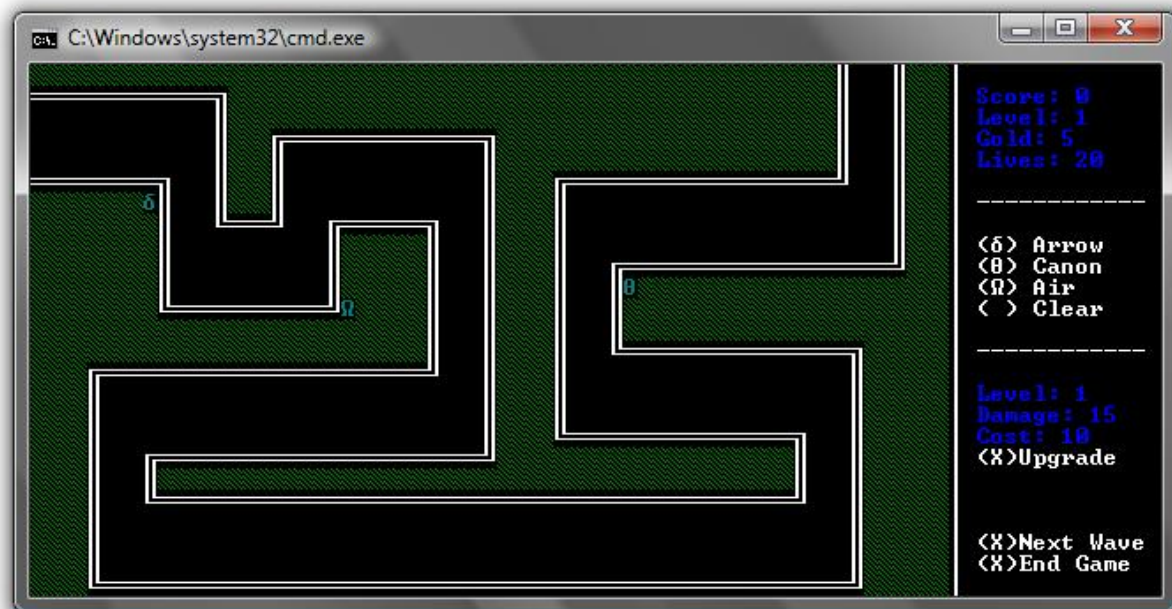

**Pressing on the Help shows you this screen. To exit this screen press any key on the keyboard.**

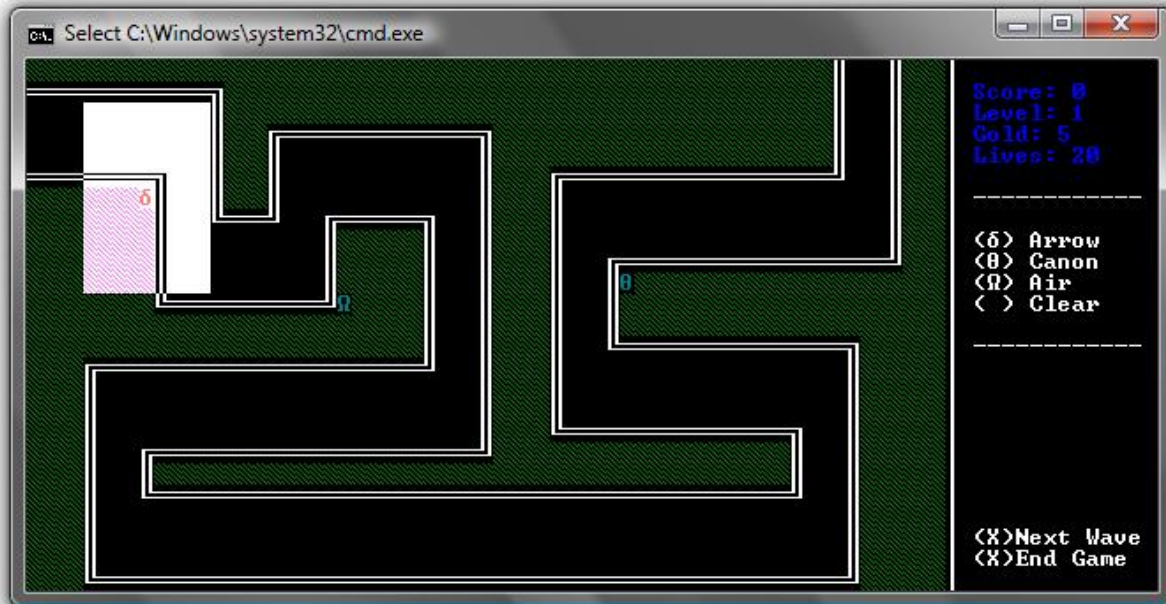

If you press on normal mode or the endless mode then you will see this screen.

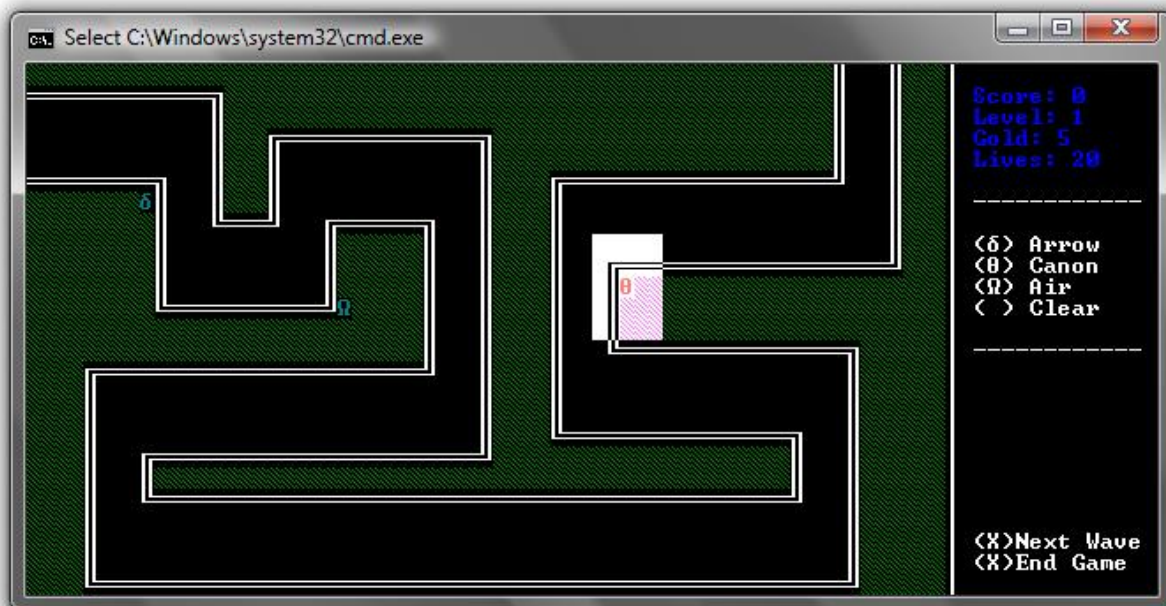

On the right side you can click on one of the towers and then click on a green area to purchase it. Three towers are placed on this field.

Each tower has its own individual radius at which it can hit the enemies. Here are pictures highlighting the area of radius. The arrow tower can hit with a radius of 5. Arrow towers can attack land or air units.

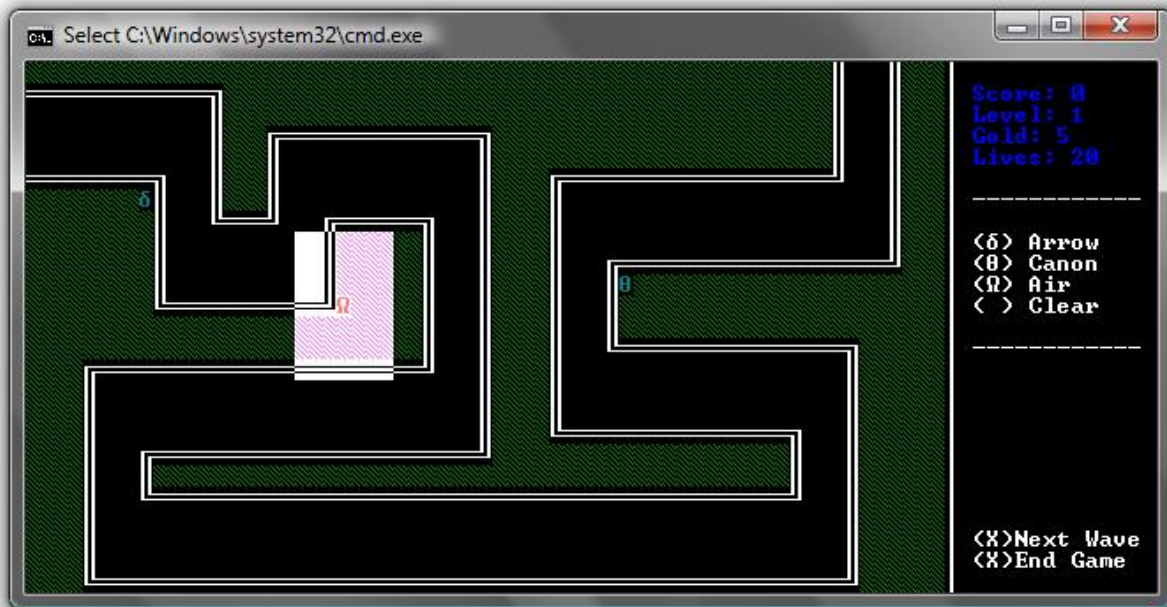

The canon tower has a radius of 3 as highlighted in this picture. Generally canons can only be placed on the edge or it will not be able to hit anything. Canons can only attack ground units.

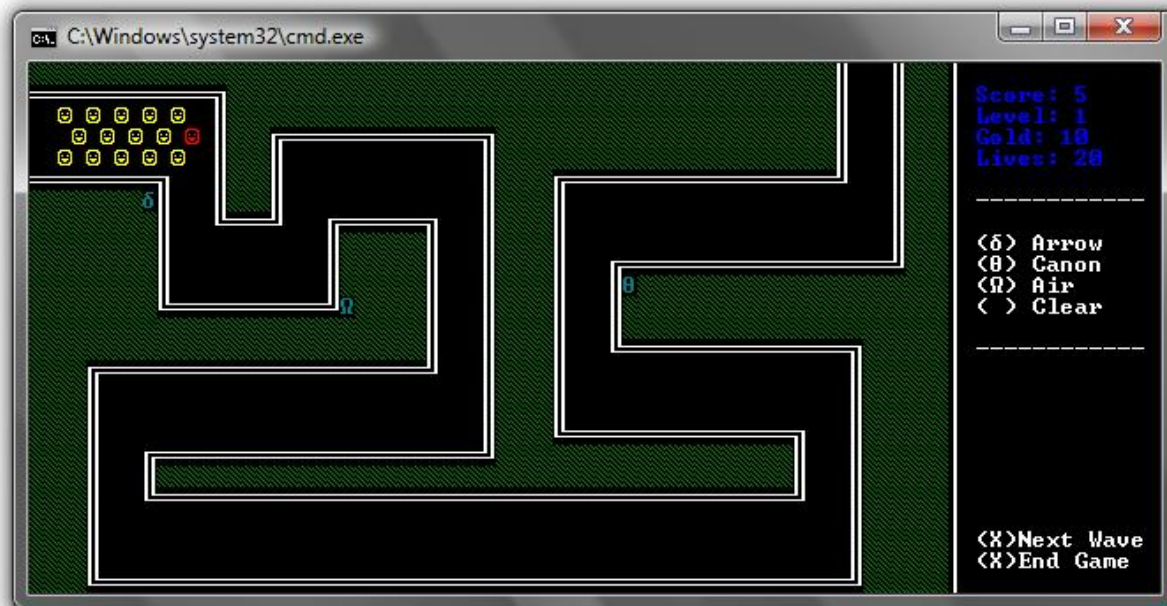

The air tower has a radius of 4. It can only attack flying units. Every 7<sup>th</sup> level is a flying level.

This is the battle screen as a wave comes out. When you click on Next Wave, enemies will come out and if they are in the range of the tower they will get hit and flash a red color.

If the enemies cannot be destroyed and it reaches the end of the path then you will lose a life. When you lose, this screen will be shown.
